6.20pm	Vote of Thanks	By Org. Secretary

### Message

**Mr. D. Chattopadhyay**  
**Principal,**  
**B.B.C.A., Hindmotor**

It is a great pleasure to know that Computronics, A gateway to Computer World, Serampore Hooghly is going to celebrate its 12-years anniversary and to make it memorable they had taken a lot of events and programs throughout the year 2020. In past some years nation is passing through a very rapid change in application in technology for its own developments but also changes took place in eco-social aspect.

In this context this institute not only focused on the teaching and training of computer they also put the liability of a torch bearer of the same by taking some initiative to make the “training” more adaptable and compatible to the common pupil specially those are near to the lower middle counter part of our society.

I would like to congratulate their initiatives and acknowledge their efforts from the bottom of my heart. I am also privileged to found myself not only officially involved as a ISO affiliating authority but also in personal level.

Hope that this celebration i.e. Celeb-12<sup>th</sup> a grand success and wish all the very best.

**DEBASHIS CHATTOPADHYAY**  
**Principal, B.B.C.A., Hindmotor**  
**ISO-9001-2015 Computer Training Centre**

**Message**

**Prof. Sumanta Daw**  
**HETC, CSE**

It is my immense pleasure to hear that Computronics, A Gateway to Computer World, Serampore is going to celebrate its 12<sup>th</sup> year of journey after starting with a limited resources of infrastructure. After their effortless effort, dedications and self sacrifices they have come a long way.

They provide the pupils from middle class or lower middle class an opportunity to flourish them as an IT-conceptual pupil. They are been not treated as a student but they are treated as a professionals of future. That's the "ideology" that makes the institute different.

It is my privilege that I was also a part of their mission few years back; and I closely observed their way of work. I really appreciate that.

They had organized state level conferences and seminars. They had also organized workshops and gathered views from eminent personalities related to their field of work and extracted it for the students of the institution.

I congratulate all the organizing team members and wish them every success in their near future.

I wish the celebration a grand success.

**SUMANTA DAW**

**FROM THE DESK OF**

**Mrs. R. Chakraborty**  
**President,**  
**Computronics, A Gateway to Computer World**

At the very onset, I would like to express my sincere congratulation and thanks to the organizers for arranging the Celeb-12<sup>th</sup>, which is a tale of journey from a point to a dizzy framed destination.

In this pious occasion i.e. the closing ceremony of the celebration of the journey I would like to recollect the vision of a mission of building up such an organization which will not only serve as a computer training centre, but it will also be a centre where students have the freedom to flourish their ideas, concepts through learning, advance projects and be confident in communication.

In this august occasion of 12<sup>th</sup> year celebration of the institution, I would like to thank the BBKA, Hindmotor authority and those who were and are a part of this journey.

I wish the celebration and all involved in organizing it a great success.

**RATNA CHAKRABORTY**

**Ms. I . Saha; Convener  
(Celeb 12<sup>th</sup>)**

Computronics, a Gateway to Computer World, has been tirelessly fulfilling its aim of promoting excellence in technical education since 2008. We at the institute intend to create ample opportunities for the students and equip them with technical education which is the need of the hour.

The institute is not only a budding ground for the students. But, it aptly supports its faculty by creating a suave working atmosphere and provides them with liberty to shape the young minds. As a teaching faculty of the institute since 2017, I have witnessed how the institute goes beyond mere professionalism and serves its students to help them grow and become trained and responsible citizens. It rightly organizes talk shows, seminars and lectures on various topics by experts from various fields and therefore exposes the students to myriad experiences and makes the process of learning, interesting and enjoyable.

We, at the institute, promise to work hard and create more opportunities for our students so as to we can contribute our bit in building a better and knowledgeable society.

Thank You

**ISHITA SAHA  
CONVENER  
Organizing Team**

**Mr. A. Majumder; Faculty member**

Teaching is one of the noblest professions anyone can opt for. I got this opportunity from "Computronics". It's been 6 years that I'm associated with this Institution as a "Teacher". The environment of this institution is apt for the nourishment of the young minds and for effective transmission of knowledge. So we need to be more sensitive to our students' frame of mind. Not only students, as a teacher we can learn a lot from this Institution as well.

In our 12 years of journey, I have got many experiences in this institute which has helped me to grow. From the time I am associated with Computronics as a Hardware Engineer, I'd seen the struggle but this Institute never chose to quit and has always prioritized its students. I can guarantee that in the upcoming years our institute will grow more strong and compact. More people will recognize this institute which is working on basics of our society because the main focus of our Institute is to teach students how to learn and further pass on the knowledge to their next generation. The institute also teaches how to stay calm which is an essential skill. It also sharpens their mind and make them eligible human beings.

I've seen many computer institutes but in my opinion none of them can take care of students like our institution does. I've never seen an Institute working on students mind to guide them in right direction.

Though there is no such lack of infrastructure but I have a small proposal for this institution i.e. to allocate more time for our students in order to make them more skillful so that "Computronics" can form its own IT team. As a guest teacher and as a well wisher of this institution I wish the Institute all the success and fulfillment towards goal and I want to see "Computronics" as a brand name.

**ARNAB MAJUMDER**

**Mrs. S. Dutta (Majumder); Ex. Faculty member**

I am feeling much emotional when I picked up the pen to write about the experience with the institute, Computronics. I was a student of this institute and became an instructor of the same. The journey from a student to an instructor was a memorable part of my academic life.

In the year 2010 I took admission in this institute and left for further job sector in 2015. During this 5years I had not only trained in related subject I learnt "how to learn and teach". One common statement I heard in several occasion that "if you want to be a good teacher then always ready to be a student". It is better fitted for this institute.

I am very much privileged to be a part of this glorious journey of 12years of Computronics, A Gateway to Computer World.

I would like to congratulate the authority and associates for their achievement and wish them good luck for their efforts in social aspects as well.

With well wishes,

**SHIWLI DUTTA (MAJUMDER)**

### Acknowledgement

**Organizing Secretary**  
**Computronics, A Gateway to Computer World, Serampore**  
**&**  
**Celeb 12<sup>th</sup> and PSDP'21**

It is my great privilege and pleasure to express my gratitude to all the guests, speaker(s), present and ex-students, guardians and participants on behalf of the organizing committee of **Celeb'12<sup>th</sup> (12<sup>th</sup> year celebration of Computronics)** and **PSDP'21 (5<sup>th</sup> year of Presentation and Skill Development Program)**.

I express my sincere thanks to the distinguished Guest(s) and the members of the Technical and Advisory Committee for their continuous support and encouragements.

I have great pleasure in placing the “Journey of 12-years, a stepping stone”, a printed form of the enormous dedication, thoughts, concentrations, all square supports of the eminent engineers, academicians, professionals, well-wishers and different representatives of different parts of the society.

I would like to congratulate the organizers have taken all effort to make the “Journal” error free. But still some errors might have crept in for which they apologies in anticipation. It is hoped that readers will enjoy and have a glimpse of the path crossed by the institution during its twelve years and collected the gems of memory and experiences.

It is my sincere thanks go to the session chairperson(s) of different events organized by Computronics in different time to time for their golden presence and cooperation and encouragement .

At last but not least I acknowledge the efficient cooperation received from the members of the organizing committee which made the “Celeb-12<sup>th</sup>” event possible during the pandemic situation.

Now, I hope that the experiences and memories and blessings we gathered in this journey will be a milestone in the life.

Welcome to Celeb 12<sup>th</sup> year celebration of ComputronicS (Celeb-12<sup>th</sup>), Serampore, Hooghly, West Bengal , India.
